# BUCEGICIRCUIT

7 days advanced tour, 200km, +6000m/-7500m

Bucegi are one of the most impressive and popular mountains in Romania. Reaching as high as 2507 at Omu Peak, Bucegi mountains offer opportunities for trekking, rock climbing, skiing, ski touring, etc. Mountain biking is a more recent entry on this list, but the possibilities are endless, from mild dirt road pedaling to extreme single trail riding.

Our circuit around and through the Bucegi mountains will give you impressive views over the East and West huge rocky faces while cycling on single trails, single tracks and mountain dirt roads, through some lush beech and pine forests or alpine pastures. From the foothills of Bucegi to the very top, and then down again, we prepared for you a pure feast of mountain biking.

The tour is suitable for advanced cross-country, all-mountain and enduro riders. Each day offers a well balanced route, making you feel thrilled and accomplished in the evening without leaving your engine out of steam for the next morning. The routes are accessible from July to early October.
